TITLE : DRAW FORMED CONTAINER  
COMPRISED OF CYCLIC OLEFINIC  
COPOLYMER

ABSTRACT : PROBLEM TO BE SOLVED: To provide a draw formed container comprised of cyclic olefinic copolymer for which stains at the outside thereof due to sticking of fingerprints can be prevented completely.

SOLUTION: In a container having at least the outside surface of cyclic olefinic copolymer, the cyclic olefinic copolymer forming at least the trunk part 2 of the container 1 is made in molecular orientation arranged at least in the uniaxial direction, and the cyclic olefinic copolymer at the outside surface of the container is made in relaxed molecular orientation. The haze value at the outside surface of the container 1 when in coating test made by a mixture made of aliphatic petroleum fraction (CAS No. 8052-41-3) and petroleum base oil (CAS No. 64742-65-0) is less than 20%.
